

Cathy's Care — Brand Look (locked 3 Sep 2026)

Direction: Option 1 — Warm & Earthy. Confirmed by Cathy. A/B-testable (one variable swap per page, test once traffic flows).

The look

- Cozy, honest, from-the-heart-of-Tassie. **White (#FFFFFF) only** — page background AND every card; no cream anywhere (reads clean & consistent). Teal/sage accents, deep #3d5a54, terracotta CTA, soft rounded shapes echoing the heart/curve in the logo. **Logos on transparent.**
- **Image-led, less text.** Big real photo up top; one idea per screen; short benefit-first copy; real numbers as big stat tiles; one CTA per page.
- Typography: **Nunito** headings + **Nunito Sans** body (see `brand-type-spec.md`); Arial in email.

Palette

`--deep #3d5a54` · `--teal #80a3a5` · `--sage #8eb0a0` · `--ink #23332f` · `--paper #ffffff` (white only — page + cards) · `--accent/terracotta #c97b4a` · muted `#5c6b66` · line `#e5e0d8`. **No cream.** Logos/transparent.

Page template (used on all 4 product pages)

1. **Hero** — real photo + one-line hook + one CTA (the email form or buy button).
2. **Benefit tiles** — 3–4 short image-led tiles (no paragraphs).
3. **Money proof** — big stat tiles (\$45k/6mo · ~\$75/hr · ~\$23 hr/wk · ~\$90k/yr), gross, example-not-promise.
4. **What you get** — short, scannable, honest.
5. **Trust strip** — 1st 4 Care · ABN 96 690 366 075 · guarantee · real Tassie business.
6. **One CTA** + FAQ + footer.

A/B plan (test once traffic allows)

- Each page: swap ONE element (headline / hero image / CTA text / button colour) at a time; keep the rest fixed so results are readable.
- Don't test until real traffic exists (honest: low volume now = no meaningful signal).
